## DETAILED ACTION

### *Title*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Specification*

2. The disclosure is objected to because of the following informalities: In Paragraph [046], the term 'Figure 4' should be changed to "Figure 4A". Appropriate correction is required.

### *Claim Objections*

3. Claim 8 is objected to as being in improper form because a dependent claim cannot depend on itself.

### *Claim Rejections - 35 USC § 112*

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 9, 17, 25, and 39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 9, 17, 25, and 39 are vague and indefinite because it is unclear how to *dynamically* distribute a feature application across a node and a central server.

Art Unit: 2143

Claims 1, 9, 17, 25, and 39 are vague and indefinite because it is unclear what is the relationship among a feature application and a user interface and a process portion.

Claims 1, 9, 17, 25, and 39 are vague and indefinite because it is unclear how is the process portion being used to process data.

6. Dependent claims are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

7. Applicant's arguments with respect to claims 1-32, 39-46, and 52-54 have been considered but are moot in view of the new ground(s) of rejection.
